TERMS OF ACCEPTANCE

When a patient seeks chiropractic care and we accept a patient for such care, it is essential for both to be working towards the same objective.

Chiropractic has only one goal: To restore the health potential of the body by removing spinal nerve impingements (called subluxations) which may be contributing or causing certain health condition. To remove the spinal nerve impingement a specific process is used which is called a chiropractic adjustment. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Although chiropractic has clinically been associated with the reduction of many symptoms and health conditions, we do not offer to diagnose or treat any disease. We only offer to diagnose either vertebral subluxations or musculoskeletal conditions. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. Regardless of what the disease is called, we do not offer to treat it.

When pressure is removed off a nerve, the nerve will begin to heal and that will increase the function of the muscles, joints and organ systems the nerve supplies. Additional information is provided on our website at www.AlignLife.com.

I have read and understand the information above.
